

## 35TH YEAR—No. 8

**TERM OF OFFICE**

**Practically New Board of Aldermen  
Selected—Marshal Jones Wins  
Over All Opponents—Egloff  
and Ladner Returned.  
Official Figures.**

Saturday's regular municipal Democratic primary election gave Mayor G. Y. Blaize quite a plurality over his opponents when the official count long after midnight gave him a total vote of 406.

Glover notified the Democratic executive committee, in session Monday morning, while canvassing the votes, that he had withdrawn and would not enter into a second contest, thus giving Blaize the nomination, and, accordingly, the committee declared him the official nominee.

**New Board Elected.**  
Aldermen elected are Charles Traub, for the First Ward; James Marx, for the Second; H. DeS. Gilum, for the third, and L. C. Carver, for the Fourth. Carver is the only man returned to the Board of Aldermen, and gives the Mayor a board all friendly. This alignment assures a most harmonious council body for the future, and Mayor Blaize's policies and plans should gain fruition.

### Albert Jones Decisively Defeats Opponents.

Albert Jones, city marshal, defeated his three opponents most decisively, thus saving himself a second primary. He understood that a considerable opposition to Jones, merely political, but the voters thought differently and returned Jones by an overwhelming majority.

Tax Assessor Egloff had a formidable opponent, but he was nominated by a vote of 460 to 367. Egloff made a most intensive campaign, but clean and above criticism, while Egloff remained at his post of

The Echo herewith gives the official vote, all other reports and published figures possibly to the contrary notwithstanding:

**Official Results.**

G. Y. Blaize	406
Harry C. Glover	310
Wm. C. Sick	111
or Tax Assessor and Collector:	
Murray T. Bangard	367
F. H. Egloff	460

Albert Marshall:	
Albert Jones	465
Robt. E. Maynard	71
John O'Neil	19
Peter Ramond	272
City Auditor and Secretary:	
Robert J. Conner	218
Sylvan J. Ladner	601
Street Commissioner:	
August Taconi	246
Albert J. Fagler	157
George J. Tocco	60
Dan J. Zieve	240
Alderman—Ward 1:	
Charles Traub, Sr.	269
George J. Tocco	60
Alderman—Ward 2:	
James Marti	1,116
Rapual S. Blaize	98
Alderman—Ward 3:	
Richard Heitzman	60
A. deS. Jilum	100
Alderman—Ward 4:	
C. C. Carver	69
A. Lawler	41
At-Large for the election	100

E. Thiery, Paul Mollere, W. O.vester; clerks, Geo. M. Schoonster, Frank Taconi, W. C. Brendel, peace and returning officer. The day was ideal, and the good weather brought out a splendid vote. The day passed without the slightest disturbance or misunderstanding. The most friendly spirit prevailed on every side.

**ST. PILING FOR LAKE SEAN.**

ell Ships Carload of Creosoted  
Timber For Lake Pont-  
chartrain Structure.

idell, La., Feb. 16.—A carload of  
piling has left the local plant of  
Gulf States Creosoting Company,  
signed to the Watson-Williams  
contract, at South Point, at which  
place the first test of the foundation  
will be made for Lake Pontchartrain  
dredge. The piling will be driv-  
en about half way between South  
Point and Point Aux Herbes, and  
that location will extend across  
the lake in a course approximately  
parallel to the present bridge of the

The preliminary work will be done under the supervision of Horace Wilder, well known New Orleans construction engineer.

For several weeks engineers idled because of high water, work resumed Sunday on the West river bridge, under W. F. Decker's management. This bridge, about four miles long, extends across Honey Island, is the last inland link in the Old Spanish between New Orleans and the Gulf Coast. The route from the delta to the Mississippi includes a distance of approximately 20 miles, financed by the taxpayers of the parish and Ninth wards of St. Tam Parish, and the United States and State aid federal governments.

The present route to the Gulf from Slidell is north through Lake Borgne, then westward, driving nearly 100 miles to the river comes back to a point hardly

### THOROUGHbred CODE.

I believe in work. For discontent and labor are not often companions. I believe in thrift. For to store up a little regularly is to store up character as well.  
I believe in simple living. For simplicity means health and health means happiness.  
I believe in loyalty. For if I am not true to others, I cannot be true to myself.  
I believe in a cheerful countenance. For a sour face is the sign of a grouch.  
I believe in holding up my chin. For self-respect commands respect from others.  
I believe in keeping up my courage. For troubles lie before a brave front.  
I believe in bracing up my brother. For an encouraging word may save the day for him.  
I believe in living up to the best that is in me. For to lower the standard is to give up the fight.  
I like the slogan: "A man may be down but he is never out."—Author unknown.

So, the Stillmans have made up after their little spat.

An optimist is one who spends his last dollar for a bill-fold.

Chemists might try their hands at inventing a cheap synthetic potato.

Much modern fiction is bad enough, but the truth is even worse.

Charity covers a multitude of sins only until the much-rakers get busy.

That proposed food merger appears to be suffering from indigestion.

Don't be shocked when you hear that a gray-haired lady friend has dyed.

Nearly seventeen million dollars were deposited in school savings banks during 1925.

A bookkeeper may hold his job by getting the accounts balled up so that no one else can understand them.

Hopeful note from a newspaper of Victoria, B. C.: "The board was gratified to learn that receipts were 50 per cent greater than last year and the hope was expressed that next year the cemetery will be self-supporting."

Harper's tells of a little girl sent to an institution for feeble-minded, but found merely "sub-normal" and returned home. Her little sister in a burst of confidence told a playmate: "Janie was sent away to be an idiot, but she couldn't pass and had to come back."

In Pima county, Ariz., a school applied for a teacher who could "smoke, dance, sing, play the piano, look attractive and entertain nicely." The requirements were filled by the board, in the person of a young woman who had been fired from another school for doing these things.

The small church near Nashua, Ia., immortalized by the song, "The Little Brown Church in the Vale," continues to be the Mecca of couples matrimonially inclined. During 1925 it broke all previous records with 209 weddings, most of the ceremonies being performed by the local pastor, Rev. George Hanna.

Raymond Richards, student at the University of Nebraska, was found to have his heart on the right side, his appendix on the left and other internal organs correspondingly disarranged. The dispatch failed to state whether he had been in a cyclonic twister or had merely been doing the Charleston.

Sir John Martin Harvey, famed English actor, told a Montreal audience that the best league for peace was the British Empire and the United States. Some verses in praise of England were recited, which roused his hearers to enthusiasm. Then he told them that the poem was written by an American.

A negro Baptist preacher of Tampa, Fla., has taken drastic steps to reform conditions in his church, as indicated by the following published notice: "To whom it may concern: I, Rev. G. W. Code, pastor, have turned out all the members of the Friendship church for not attending as they ought to. I am going to start a revival meeting and get a new congregation."

Officials of the Alabama Power Company were perturbed recently by seeing a moving picture of dedication ceremonies at their great Cherokee dam, which will form the world's largest artificial lake. The location was stated to be "near Tallahassee, Fla.," when it is really in Alabama. The Birmingham News commented on the error under the caption, "A Dam Stance."

### WASHINGTON, THE MAN.

Monday, February 22, marks the 194th anniversary of Washington's birth. In view of a recent controversy over the personal characteristics and habits of the Father of Our Country, a brief reference to some less familiar facts of his life seems timely, his public record being almost universally known.

He was born on a Friday, apparently not an unlucky day for him, for the great nation of which he was destined to be the founder. His great-grandfather, John Washington, came from England and settled in Virginia in 1657.

George Washington was the son of Augustine Washington, by his second wife, nee Mary Ball. After his father's death, when he was 11, the lad was under the guardianship of his half-brother, Lawrence, with whom he visited the West Indies, where he had small pox. He was appointed a midshipman in the British Navy, but was prevented from going to sea through the objections of his mother.

Otherwise, little is known of his boyhood, and the various stories concerning it, including that of the "hatchet and cherry tree," have no historical basis. He had only a very elementary education, excepting in mathematics, in which he was principally self-taught, and at the age of 13 became a surveyor.

Later he inherited the family estate at Mt. Vernon and married a wealthy widow, Mrs. Martha Custis, becoming one of the richest men in America, owning 70,000 acres of land in Virginia and later 40,000 acres farther west, given him by the government for his military services.

He was a large slave owner, but hoped for the ultimate abolishment of slavery; he was not a prohibitionist; he was a member of the Episcopal church. He was a powerful man, more than six feet tall, with big hands and feet, sandy hair and blue eyes. Mrs. Washington was small and plump, with dark hair and hazel eyes.

During his career Washington was at times most violently denounced by his opponents, who tried to deprive him of command of the army, condemned him for approving the location of the national capital near Mt. Vernon, spoke of him contemptuously as "the step-father of his country," and even hinted at his propriety of building a guillotine for his execution. He once considered resigning from the presidency and later expressed regret that he had not done so.

But the great mass of the people were unwaveringly loyal to him to the end, and he might have had a kingly crown had he so desired. In the final judgment of the American people he has fully sustained the eulogy passed upon him at his death by the great Marshall:

"First in war, first in peace, and first in the hearts of his countrymen."

### BUILD ROADS TO LAST.

In this remarkable era of good road building, much discussion of methods and materials to be employed in construction has been heard. Various types of roads have their advocates and claims are made for the superiority of each.

As a matter of fact, so far as material is concerned, local conditions may be permitted to govern to a great extent, provided any one of the well-tested kinds that may be available is used. It would seem to be inadvisable to ship road materials great distances when an equally good product might be secured close at hand.

But, regardless of the surfacing material to be used, the grading and foundations should be of a permanent nature. Every interest of economy demands that before any great sum is spent on the improvement of a road the final surveys and establishment of grades should be made, so that fills may be allowed to settle and become compacted before surfacing is done.

A firm foundation is highly desirable in any undertaking, and nowhere is this more strikingly true than in road building.

### SOAKING THE INVESTOR.

An unusual item appeared in a North Carolina newspaper, the Reidsville Review, the other day. It told of a citizen of that town who owned a piece of property desired by a corporation as a location for a new enterprise. He said: "Take it and pay me what you care to."

According to the customary practice, he would have asked two or three prices for the land, especially if he knew that it happened to be particularly suitable for the investor's purpose.

How many cities and towns are retarded in growth and prosperity by greedy individuals who seek the opportunity to "soak" the newcomers planning to establish a new industry!

The spirit shown by that Reidsville citizen is the sort that helps to build up a community. The contrary attitude kills the goose even before it begins to lay the golden eggs.

Among the surplus crops raised in 1896 a list of candidates

### OUR OWN HOTEL WESTON.

Just now the Coast press is devoting liberal space and commenting on the subject of building hotels and hotel buildings, present and prospective, attracting considerable attention, to say nothing of the interest manifested by friends of this section. This favor to a particular section is due to the fact that at no time has such activity prevailed and commanded similar attention. Since we are growing faster as a winter and summer resort than through any other channel, it is imperative we have hotels, and build them we must.

We have the completion of additions to several hotels, improvement of no mean magnitude, enjoying prestige and substantial clientele. In construction, we have two of the largest, "Edgewater Beach," east of Gulfport, and "Pine Hills," near Bay St. Louis. Both will represent an investment of millions of dollars. Both will vie with the other.

In alloting so much newspaper space to hotels, the outside reader must not become obsessed with the idea these are the only ones worth while, so to speak. On the contrary, the Coast is pretty well equipped for the present at least. That is under normal conditions. However, we are no more on the eve of a Greater Gulf Coast and a new era, for that time is here, and it is but a subject of sequence that we must build to meet requirements that are commanding and insistent.

Here in Bay St. Louis we have in operation the new Weston Hotel. Travelers, who come and go, are unanimous in the expression to the effect this is not only a modern and excellent hostelry in all respect, but the service and every appointment well compares with establishments of its kind and size to be found elsewhere.

Bay St. Louis, and the balance of the Mississippi Gulf Coast, will share in the opinion the Hotel Weston is not only a credit to the source responsible for its building and to this section, but an asset of import. It is interesting to note the patronage accorded the Weston and the goodwill and general favor it enjoys. The Hotel Weston seems to have set the pace in this section. Since its building many improvements have followed. There is no doubt of this. One needs only to look around to confirm this. Bigger hotels there are, but none better.

### HERE'S A RECORD.

There is a remarkable firm of general merchants in the little town of Clear Lake, S. D., which probably holds the world's record for consistent and adequate advertising in a community of that size.

English & Towers have carried a full-page advertisement in the Clear Lake Courier every week, without a miss, for twenty years. They have contracted for a similar space for each week of 1926.

Yet Clear Lake is a town of only 835 population, in a county with but 8,759 people, with two newspapers. The extent of the firm's advertising with the other newspaper was not stated in the source of our information, but it is reasonable to suppose that it was considerable.

From their extensive and persistent advertising, English & Towers appear to be pretty thoroughly sold on the proposition. As the Courier says: "They have proven to their satisfaction that large space in the newspaper regularly brings correspondingly big results."

### THE BILOXI CARNIVAL.

Every anticipation for the success of the Carnival at Biloxi was seemingly realized. King Bienville made his triumphant entry into the city Mardi Gras day; and a pageant of unusual beauty, nine floats depicting historical and other local subjects traversed the principal streets of the city, receiving the applause of thousands of citizens and visitors who thronged the principal business and residential avenues. At night another pageant was presented. The usual king and queen program, with a closing ball, followed and in all every element of success seemed to have attended the efforts of Biloxians in their enterprise to entertain the thousands of winter tourists now within their gates and from along the Gulf Coast, and thus better establishing an institution which yearly is taking permanent lodgment in a niche of its own.

Biloxi and its people are to be congratulated on their enterprise and the hope is expressed may it expand each succeeding year.

A Californian suggests that the best buy in Florida is a ticket to Los Angeles.

About the only Greek some college men remember is the name of their fraternity.

Chicago is to have a new two million dollar hog pen, but even that would not hold all the road hogs.

Former Sultan Mohammed of Turkey is now living pretty much like the rest of us—on borrowed money.

"Complications" and "static" are words used by the doctors and radio men who don't know what the real trouble is.

### A LITTLE WALK AROUND YOURSELF.

When you're criticizing others you are finding, here and there, a fault or two to speak of. Or a weakness you can tear; When you're blaming someone's weakness, Or accusing some of self—It's time that you went out To take a walk around yourself.

There are lots of human failures In the average of us all; And lots of grave shortcomings In the short ones and in the tall; But when we think of evils Men should lay upon the shelves—It's time we all went out To take a walk around ourselves.

We need so often in this life This balancing of scales; This seeing how much in us wins And how much in us fails; But before you judge another Just to lay him on the shelf—It would be a splendid plan To take a walk around yourself.—Selected.

### BUSINESS BRIEFS.

At least 100 communities in Louisiana and Mississippi obtained new or improved electric service during 1925, through consolidations and extensions of power and light systems.

More than a million and a half electric incandescent lamps are used by the United States government every year.

Production of crude petroleum in the United States dropped from 2,340,000 barrels a day in June, 1925, to 1,915,000 barrels daily on February 1, 1926.

Fire losses in the city of New York last year totalled approximately \$34,000,000, involving 5,340 insurance claims.

During 1925 there were about 275,000 automobiles stolen in the United States, of which only 17 per cent were recovered.

Canada shipped more than 7,000,000 bushels of wheat abroad through United States ports last year.

Construction in Florida cities for 1925 included the following: Miami, 60 million dollars; Coral Gables, 25 million; St. Petersburg, 24 million; Tampa, 23 million; Palm Beach, 18 million; Miami Beach, 17 million; West Palm Beach, 17 million; Hollywood, 15 million; Jacksonville, 14 million.

### INTERESTING NOTES.

A new 10 cent air mail postage stamp has been placed on sale, the design including a miniature map of the United States, with an airplane on each side.

Potatoes are about three times as high as they were a year ago.

It is estimated that thirty-three million people pass through the Pennsylvania Railroad station in New York each year.

Italy's recent census shows the population of that country to be 42,115,606.

About 150 million dollars were collected in gasoline taxes last year.

A human skeleton, estimated to be 50,000 years old, was recently found in the Crimea by a Russian scientist.

There are now nearly nine million electric sad irons in use in America. Patents granted in the United States last year totalled 46,450, breaking all records.

During 1925 more than two million American tourists visited Canada.

New York city consumes about 200 carloads of granulated sugar every day.

### ABOUT WOMEN.

Miss Marion Tally, 18-year-old daughter of a Kansas City telegraph operator, made her grand opera debut in the role of Gilda in Verdi's "Rigoletto," at the Metropolitan Opera House in New York this week. She is the youngest singer to be so honored.

Women are definitely barred from jury service in Illinois through a decision of the state supreme court.

Mrs. Nancy Littlefield, who died recently at Selmer, Tenn., at the age of 90, left 10 children, 85 grandchildren, 159 great-grandchildren and 23 great-great-grandchildren.

Miss Pearl Kramer, 30, has been made a director in the Winburn banking firm in Wall Street, after ten years experience in finance.

Mrs. Ben H. Urbahans has been appointed State treasurer by Governor Jackson of Indiana, to succeed her late husband, who requested just before his death that she be given the place.

Mrs. Coolidge is a most excellent housewife and personally supervising much of the White House housekeeping.

Thousands of Chinese women formerly employed in making hair nets have been thrown out of employment by the bobbed hair fashion.

### FEDERAL AID IN MISSISSIPPI.

State Receives \$123,447.61 During First Six Weeks in 1926—\$6,720.13 for Harrison County.

The State of Mississippi received \$123,447.61 in federal aid funds during the first six weeks of 1926, to be used in the construction of nine roads on the federal system, the funds to be expended under the direction of the State Highway Commission, it was announced at the State treasurer's office today.

The cost of federal aid construction is provided, aside from the federal aid funds, largely by counties in which the projects are located, according to J. E. Denham, office engineer of the Highway Department. The funds provided by the counties are supplemented in some instances by allotments of the State Highway Commission.

Federal aid construction has progressed rapidly an dime amount this year is expected to exceed all others according to the present plans of the State Highway Commission. Federal aid payments and the projects on which they are to be expended for this year are as follows:

Project 74—Jefferson Davis county, \$822.30.  
Project 84—Neshoba county, 103,791.05.  
Project 19 A—Montgomery county, 22,686.19.  
Project 79 A—Hinds county, \$4,245.20.  
Project 152—Calhoun county, \$35,188.22.  
Project 159—Hancock county, \$6,686.12.  
Project 168—Harrison county, \$6,720.13.  
Project 173 A—Union county, \$3,814.99.  
Project 147 A—Grenada county, \$50,493.41.

### CHANCERY SUMMONS.

The State of Mississippi, To F. L. Minder and John E. Cain, complaining co-defendants of Minder & Cain. You are summoned to appear before the Chancery Court of the County of Hancock, in said State, on the 2nd Monday of March, A. D. 1926, to defend the suit No. 2865 in said Court of W. G. Thigpen, being a suit to attach and subject to compulsory demand all the personal property and effects of Minder & Cain, wherein they are defendants.

This the 12th day of February, A. D. 1926.

### CHANCERY SUMMONS No. 2864.

The State of Mississippi, To John Hopkins, et al., and, if dead, his unknown heirs at law or legatees; to John F. Miller, et al., and, if dead, his unknown heirs at law or legatees; and all persons having or claiming any right, title or interest in and to the following described land, in Hancock County, Mississippi, to-wit:

Lot No. 1 in the rear of the First Ward of the City of Bay St. Louis, as per official map of said City, made by E. S. Drake, C. E., and filed May 1st, 1924, in the office of the Chancery Clerk of Hancock County, Mississippi.

You are commanded to appear before the Chancery Court of the County of Hancock, in said State, on a rule day of said Court, to be held at the office of said Clerk, on the second Monday of March, A. D. 1926, in the City of Bay St. Louis, then and there to answer, plead or demur to the bill of complaint of Leonard E. Nicholson, being No. 2864, wherein you are defendants, in a suit to confirm title.

This the 25th day of January, A. D. 1926.  
(Seal.) A. A. KERGOSIEN, Clerk.  
By A. G. FAYRE, D. C.

## Pains Very Severe

"I suffered from womanly troubles which grew worse and worse as the months went by," says Mrs. L. H. Cantrell, of R. F. D. 9, Gainesville, Georgia.  
"I frequently had very severe pains. These were so bad that I was forced to go to bed and stay there. It seemed to me my back would come in two."

## CARDUI

For Female Troubles

"I taught school for a while, but my health was so bad I would have to stay out sometimes. This went on till I got so bad I didn't know what to do.  
"One day I read about the merits of Cardui, and as I had some friends who had been helped by it, I thought I would try it. I began to get better after I had taken half a bottle. I decided to keep on and give it a thorough trial and I did. I took in all about 12 bottles and now I am perfectly well. I do not suffer any pain and can do all my housework."

## WINTER BEST TIME TO DEHORN CATTLE

Cattle with horns require more space at the feeding trough and the stronger animals hook the weaker away. It is a good practice, therefore, to dehorn cattle put on feed for fattening and because of the danger from flies and maggots in summer, the winter months are best for this operation.

"Two methods are commonly used for dehorning cattle," says Prof. R. S. Curtis of the animal husbandry division of the North Carolina state college. "Some successful growers use the saw while others use the dehorning clippers. The clipper method is quicker but has a tendency to mash the horn and the horn core. Either method may be used but care should be taken to see that the horns are cut off close to the head, otherwise a stub horn will develop and will not only look bad but will leave the animal with the original disadvantage."

Professor Curtis recommends that a chute be constructed, where a large number are to be treated. This chute will confine the animal rigidly and the head is held firmly for the operation. When the horns are removed, some feeders treat the snout with a covering of tar. This is not necessary in cold months, but the animal should be carefully watched so that maggots will not get into the wound. When the animals have been properly dehorned, hair will grow over the snout, giving the appearance of a naturally pointed animal.

Professor Curtis states that purebred animals intended for the show ring should not be dehorned. If the herd is used only for breeding stock, the horns might be removed with profitable results.

## Feeding Iodide to Pigs

### Tested by Iowa Station

The results of three pig-feeding trials in which the chief objective was to determine the influence of iodine feeding have been reported by the Iowa experimental station in research bulletin No. 23.

A summary of the three trials shows that the average daily gain of the pigs not receiving iodide was 1.372 pounds and the gain of the iodide group was 1.508 pounds. The feed required for 100 pounds gain for the first group mentioned was 450 pounds and for the iodide group 405 pounds. The daily gain was increased 9.91 per cent in the iodide group and the feed requirement reduced 10 per cent.

In the first trial the potassium iodide was added to a supplemental protein, vitamin, and mineral feed mixture at a rate of one-tenth of a pound to 1,000 pounds of feed and this was self-fed.

In the second trial, the potassium iodide was added to a mineral mixture composed of equal parts of finely ground limestone, flake salt, and bone meal at the rate of one-tenth pound to 100 pounds of the mineral mixture. Ten pounds of this mixture were added to each 100 pounds of a supplemental protein feed mixture and this was self-fed.

In the third trial the potassium iodide was added to a mineral mixture which made it then composed of 19.90 parts flake salt; high calcium limestone finely ground, 39.98 parts; spent bone black, 39.98 parts; and potassium iodide, .05 pound or 288 grains or .6 ounce apothecaries weight; total 100 pounds. This was self-fed.

## Largest Litters Always

### Bring Biggest Profits

"The average size of litters of pigs for all breeds is less than five," says Howard J. Brant, swine extension man at the Wisconsin College of Agriculture. "The cost for each pig up to weaning time, according to an experiment carried out on a Wisconsin farm, is \$2.09. If the litter average could be brought up to eight, the cost would be \$1.57 each."

Since 52 cents may be saved on each pig at weaning time, it would seem a worthwhile proposition to get at the cause of the losses. Figures compiled agree fairly well on 34 per cent being lost from birth to weaning time. The causes for losses are listed here as given by the United States Department of Agriculture on farms in Illinois and Iowa: 9 per cent farrowed dead, 4 per cent farrowed weak, 3.5 per cent from intestinal infection, 3.3 per cent from premature birth, 2 per cent starved, 1.8 per cent scurvy, 1.6 per cent chilled, 1.5 per cent eaten by sows, 1 per cent sore mouth, and 2 per cent other miscellaneous causes.

## Sheep as Scavengers

The sheep has been termed the "plant scavenger" of the farm. In fact, there are only a few of the weeds he will not eat during the early stage of his growth, and yet it must be remembered, say specialists at South Dakota state college, that the weeds grasses must be of choice quality to secure the best results in feeding operations. Less permanent pasture is required for the sheep during the season than for any other farm animal.

## Exercise for Colts

With no class of animals is exercise of more importance than with colts. A certain amount of exercise is essential to health and thrift. It increases the appetite and stimulates digestion. Young animals grow much better if they have exercise. Furthermore, horses are raised for the power they can deliver. They are valuable for their energy. Stronger muscles are developed by exercise.

## Important Factors in Care of Bees

### Much Depends on Activity of Bees and Weather.

(Prepared by the United States Department of Agriculture.)

The annual crop of a colony of honeybees is dependent upon a considerable number of factors, part dealing with the activities of the bees and part resulting from the various external factors influencing the secretion of nectar by the honey plants of the locality. Weather suitable for the secretion of nectar and the storing of it by the bees is one of these important factors. Although the weather is beyond the control of the beekeeper, a knowledge of the influence of weather factors upon honey crops in various parts of the country will be of great value in developing the best beekeeping region of the United States.

To gain this knowledge it is first of all necessary to keep certain colonies under observation, recording at frequent and regular intervals the weight of each, and recording such accompanying phenomena of the weather as may reasonably be supposed to influence either the secretion of nectar or the activities of the bees. The results of making a careful record of this kind with two colonies of bees at the bee culture laboratory of the bureau of entomology, and the mathematical analysis of the records kept, are included in United States Department of Agriculture Bulletin No. 1339, "The Effect of Weather Upon the Change in Weight of a Colony of Bees During the Honey Flow," by James I. Hamilton, apiculturist in charge of the bee culture investigations of the department. The bulletin is of technical interest to beekeepers and others working on beekeeping subjects, and is available upon application to the department while the supply lasts.

## Missouri Demonstration on Reducing Chick Loss

Thirty-two farms were used by the poultry department of the Missouri university last year in a demonstration of methods of reducing the annual losses in raising chicks. It is reported that these farms raised 88.7 per cent of all the chicks hatched. This was an unusually good showing as compared to a much heavier loss by farms which were not in the demonstration.

Five essentials were adhered to in the demonstrations, namely: hatch early, brood each hatch separately for four weeks, range on fresh ground, feed balanced rations constantly and separate pullets and cockerels.

Undoubtedly the third essential, that of ranging on fresh ground, had a great deal to do with the success of the demonstration. It has been adequately demonstrated in recent years that successful brooding cannot be carried on in old poultry lots. Farmers could greatly increase their poultry returns this year by remembering the above essentials. Fresh ground is sometimes hard to supply and, as a result, the most important essential is often overlooked.

## Get Rid of Roundworms for Success With Pigs

Success in raising pigs will depend to a great extent upon proper housing and freedom from parasites, especially roundworms, says W. C. Skelley, assistant animal husbandman at the New Jersey State College of Agriculture.

The roundworms can be controlled by the following treatment. Withhold all feed for about 18 to 24 hours and for 50 pounds of live weight give a capsule containing 2 grains of ivermectin, 2 grains of calomel, and 5 grains of sodium bicarbonate. In about 12 hours after giving this capsule feed a light slop containing a tablespoonful of epsom salts, well dissolved, for each 50 pounds of live weight. Repeat this treatment in about 14 days.

The housing need not be expensive, but should be kept clean and warm. Small portable colony houses that are tight and dry and provided with plenty of clean, dry bedding make very satisfactory quarters. Under these conditions, with plenty of good feed, fall pigs will make good gains and be ready to go on the market in the early spring.

## Corn Good Animal Fuel

### During Severe Weather

Corn is cheap, about a cent a pound. One can get fine-burning soft coal for less than a half-cent a pound.

Animals are going to keep up their body heat during cold weather. They can do this with corn at a cent a pound if the owner can do some of it for them with coal at half the corn price.

If the chill is not taken off of the cow's drinking water with coal or wood, she will warm it to 98 degrees with corn. If the pigs are forced to drink water or milk in which there is some ice, they are going to melt the ice with corn at a cent a pound. If the chickens have a warm mash at noon, just that much corn is saved. Eggs come faster.

All the way around, trading coal for corn on a fuel basis is good business.

## Early Spring Is Proper Time to Prune Orchard

Warm days during March can be profitably spent in renovating the fruit trees. Moderate pruning every year encourages annual fruiting and is much better for the tree than heavy pruning every three or four years. The work should not be delayed until growth starts in the spring.

Trees which have not been pruned regularly and have grown too bushy and dense should receive a rather heavy thinning of medium-sized branches in the outer portions of the tree. If possible, avoid removing large limbs because this leaves the tree thin in places and too dense elsewhere. All dead, diseased, broken, injured, crossing and rubbing limbs should be removed as far as possible.

## Copper Sulphate for Sheep Worms

### Method of Control Devised by Scientists Gives Good Results.

(Prepared by the United States Department of Agriculture.)

A method of controlling stomach worms in sheep devised by scientists of the United States Department of Agriculture and tested on farms for the last three years has given excellent results. The treatment consists in dosing the sheep once every 25 days with a 1 per cent solution of copper sulphate.

Losses From Worms: Following good results at the department's experimental farm near Vienna, Va., the bureau of animal industry arranged with owners of 12 farm flocks in Schuyler county, Missouri, to try the method under ordinary farm conditions. At the beginning of the experiment, all owners reported they were experiencing serious losses from stomach worms.

While the experiment was in progress no change was made from the former usual practice of grazing, which consists in the use of permanent pasture throughout the year, except in the fall, when the flocks are allowed to run in fields and meadows from which the crops have been removed. During the last year no sheep or lambs under treatment were seriously affected by the stomach-worm disease.

Treatment Does Good: The second generation of sheep which have developed under the copper-sulphate treatment are larger than their dams, have grown better wool, and have sold without culis. Buyers of feeder lambs from the dosed flocks have recognized their outstanding condition and paid top prices for them.

These favorable results were observed among more than 2,000 sheep. Full directions for using the treatment, which is comparatively simple, may be obtained on application to the bureau of animal industry, United States Department of Agriculture.

pruned until they reach bearing age, only moderate pruning of small branches is required to keep the tree properly thinned. Sunlight will then be admitted to the central portion of the tree.

In the pruning of young trees keep the head low. Also avoid cutting the main branches leave the trunk at the same point. Four or five main branches should be saved, and as far as possible so selected that they will be evenly distributed around the tree as well as up and down the main trunk. In all your pruning work use sharp, efficient pruning tools. Make all cuts clear and close and wax or paint all wounds that are over an inch in diameter.

## Does Not Pay to Grind

### Alfalfa Hay for Cows

Experiments conducted by the dairy husbandry section of the Iowa agricultural experiment station indicate that it doesn't pay to grind alfalfa hay when it is to be fed to dairy cows. At least it wasn't profitable in these preliminary tests. Eight cows were used in the experiment.

The use of ground alfalfa did not increase the yield of either milk or butterfat in these tests and, in addition, there was a greater amount of ground hay refused by the cows than of the unground hay.

It cost \$3.50 per ton to grind the alfalfa and there seems little likelihood that this figure could be reduced on the average farm, those in charge of the test say. The grinding cost, in their state, represents from 20 to 25 per cent of the market value of the hay on the farm in the average year.

## Calves Will Eat Silage

Every silo user knows that calves three or four months old will eat and relish silage; in fact, all live stock will consume silage as they would grass. Rapid and vigorous growth is not only desired, but is the most profitable in the rearing of domestic animals; and it is extremely important that the young calves be kept in a growing condition from birth. This necessitates the feeding of a succulent ration.

## Provide Fresh Air

Colds and roup in the poultry flock are usually brought about by faulty ventilation. Three sides of the poultry house should be tight, with a liberal opening in the front for fresh air. This should be covered with a muslin curtain only when it is stormy or on extremely cold nights. Frost or moisture on the ceiling or side walls and foul air in the poultry house are positive indications of poor ventilation.

## How Deep to Plow

Deep plowing is not necessarily its best good farm practice. Plow soil only so deep as you can fill it with humus is a good rule. To plow it deeper may be injurious to the soil itself, and be of no benefit to the crops planted in it, besides causing an actual monetary loss to the farmer who does it.

Good plowing, therefore, does not mean deep plowing.

## FARM FACTS

Corn, kafir, sudan, and cane seed should be tested for germination.

The old saying that a bushel of corn before a cow freshens is worth two bushels after freshening is true.

Milk is about 90 per cent water. The body weight of a cow is over 80 per cent water. To give a maximum of milk, cows must drink plenty of water.

Getting in crops is only the first step in the race. It is the man that keeps the garden and the pasture and the farm that wins the race.

# POULTRY

## DIVIDE HEN FLOCK FOR BEST RESULTS

Separate pullets from hens, say poultrymen from the New York State College of Agriculture at Ithaca. Old hens are apt, if allowed, to keep the pullets from their feed and boss them around so that they do not get a fair chance to develop as they should. Separation also lessens the risk from disease spread.

Skim milk is one of the biggest known aids to egg production and should be used to the limit. Every pullet should always have all the milk, sour or sweet, that she can drink. Cleanliness is a big factor in handling poultry successfully, and the college poultrymen suggest not only washing the milk dish every time before use, but also cleaning the roosts, the floors, and the self-feeders frequently. Some men clean the dropping boards every day, but this is not absolutely necessary.

With plenty of milk, the hens do not need so much water, and a few farmers claim better results when no water at all is given if the hens always have access to milk. The milk gives them not only water, but also much-needed proteins and minerals.

Whole cabbages hung in the scratch pens make fine green feed, but other greenstuffs are also good. It is a serious mistake to throw any large quantity of green roughage on the floor where it is apt to be wasted by getting moldy and dirty.

For the mash which pullets should always have before them, equal parts of bran, middlings, yellow corn meal, ground heavy oats, and beef scraps generally give the best results. If the chickens have all the milk they can drink, the meat scrap allowance can be cut in two. The house itself should be dry and well-ventilated. Every poultryman knows the importance of keeping his stock free from lice and mites. Litter in the scratch pens should not be too deep at first, as the pullets do not know how to scratch deep yet. Yellow cracked corn is as good a scratch feed as any one needs, but one-third of any other wholesome grain can also be added.

Add to these aids and precautions a good culling program, say the state college men, and any poultryman should be able to get both pleasure and profit from handling his flock.

The little things count in egg production, they say. They believe these practices, if followed, will increase noticeably the production of every hen in the state. They are not, of course, in favor of a greater total production of eggs, but less hens and more eggs is the combination that means money in the poultryman's pocket.

## Select Best Layers by

### Use of Good Trap Nest

A good trap nest provides the one accurate method of determining exactly how many eggs a hen has laid in one year. There is no short cut or easy way to figure from part of a year's trap-nest record what the total for the year will be, nor to cull carefully enough to estimate what it has been or will be, say poultry specialists at the Kansas State Agricultural college.

The highest type of breeding for egg production may be secured only by trap-nesting every breeder throughout every day of her first laying year, and every day throughout the breeding season, as long as she is kept. In addition, both male and female birds must be selected which have the ability to transmit high production to their offspring.

The best poultry breeders are searching for the pullet that lays not only during the spring, but is also an early maturer and heavy winter layer, as well as a persistent summer layer. These characteristics, coupled with intensity of production, are found only in the best hens, the poultrymen claim.

## Care of Breeding Stock

### Is of Great Importance

Apparently much of the trouble we have each year with poor incubator results is traceable to the condition which the breeding stock has been in for several months previous. A study of the results which some of our hatcheries are obtaining with eggs from different flocks hatched in the same machine indicate the great importance of this factor.

The hens should have plenty of grain in addition to the regular laying mash. Five per cent of linseed oil meal may be put in the mash to help the late mothers in feathering. Green feed is particularly important to breeders. Do not use lights on the breeding stock—O. C. Krum, Poultry Extension Specialist, Colorado Agricultural College.

## Cause of Diseases

Most farm poultry houses lack effective means of removing moisture and impure air. Accumulated moisture in the poultry house and an overcrowded condition are directly responsible for the colds and roup which weaken the vitality of the birds, causing them to easily succumb to other diseases. To remedy this, use the open-front type of house, which has become universally adopted, and allow at least three square feet of floor space per bird.

## Best Breed of Hens

There is no "best" breed of general-purpose fowls. The Barred Rocks, and White Rocks, Rhode Island Reds and Wyandottes are the best known breeds in this class. The Langshans are classed as a heavy or meat breed of fowls, and they are small producers of eggs. Any of the breeds mentioned will give good results if handled properly. The best advice to anyone in regard to breed is to tell him to keep the breed he likes the best.

## SPORT WITH A TRAVELING HUNTING LODGE

The ancient bus shown above arrived in Boston the other day after having traveled more than 4,000 miles in 1 month 21 days. It is a combination hunting lodge and traveling home owned by (left to right) E. P. Dupre and Ernest Wintergreen of Glen Cove, L. I. The two buck deer on the fenders were shot at Jackman, Maine.

## USE OF DIMMER IS NOT FAVORED

### Motor Code to Provide 200-Foot Visibility Is Urged by Bureau.

Amendments to motor-vehicle laws, in states which have not already revised their codes, to regulate night driving headlights so that at all times the motorist is able to see clearly 200 feet ahead instead of forcing the use of dimmers, characterized as dangerous, is urged by the federal bureau of standards of the Department of Commerce, Illinois, Ohio, Indiana and Michigan fall into the group of states that compel dimmed lights by passing motorist on highways, a practice which the bureau scientists condemn as dangerous, not alone to the drivers but to pedestrians as well.

## Spotlight Is Favored.

The spotlight, excoriated in and around Chicago, is recommended, with proper study of its use. Most of the eastern states, as well as states west of Illinois, including Wisconsin, have adopted this apparently revolutionary headlight recommendation. In the District of Columbia where it has been in effect since May 3, night motor accidents have been materially reduced. Prior to May 3 57 per cent of the total accidents occurred between dusk and dawn. Since adoption of the "simple diving light" standard, with directed beams instead of dimmed lamps, the number has been reduced to 23 per cent.

## Opposes Dimming in Country.

The whole story, according to E. C. Crittenden, chief of the electrical division of the big government experiment station, lies in intelligent use of modern devices. He makes no choice between various makes of motor headlights now on the market, one type of which uses a plane reflector with reflecting lenses, the other employing a special reflector with lenses that spread or bend the light rays downward.

"For country driving," says a part of the bureau's publication on headlights, "dimming the headlights when meeting another car should be discouraged because of the element of danger involved. Under normal driving conditions the driver's eyes are adjusted for good road illumination. When the lights are dimmed, suddenly reducing the road light, a few seconds must elapse before the eyes can readjust themselves to the new conditions. During these few seconds the driver is unable to see clearly and may collide with the oncoming car, run into pedestrians walking along the road, side or get off the road into the ditch. In addition, the lights on the approaching car seem unduly bright because of no road illumination beyond them is available to reduce the contrast with the background."

## How to Warm Up a Motor

### During Winter Season

Serious damage is done to many automobiles during the winter season by drivers who do not know how to warm up the motor," says a bulletin issued by the mechanical first aid department of the Chicago Motor Club. When the thermometer starts to drop the oil congeals, and cannot circulate properly. If the driver attempts to warm his engine by racing the motor, the thin film of oil is likely to be burned off, and a burned oil bearing may be the result of this common practice.

"When the engine is being raced, the fan is being driven at a high rate of speed which tends to cool the engine, rather than to heat it. The engine should be run slowly with the spark retarded. A retarded spark tends to heat the engine quickly. Use the choke or the primer to keep the engine from stalling."

## Auto Squibs

Maybe the fellows who start too soon when the corner electric signals say "Change" think that they say "Charge!"

It certainly wasn't a gallant speech for the young man caught driving 35 miles an hour, with one arm around his girl companion, to tell the judge that he was in a hurry.

## Several Reasons Why It Is Expensive to Speed

The driver who persists in operating his motor car at high speed may elude constables and police, says a writer in the Farm and Fireside, but he cannot escape from the penalties which natural mechanical laws levy upon his car. Here are ten reasons why it is expensive, dangerous and inconsiderate of others to speed.

Tires last about twice as long on a car that is driven at 15 miles an hour as upon cars driven at 30 miles an hour. Speeding generates heat, which is an enemy to rubber.

Driving a car around a sharp corner at 25 miles an hour does more damage to the tires than 200 miles of straight road work. Excessive side pressure on tires may pinch the tubes, and it always strains the side walls of the casings.

High speeds are likely to cause skidding and breakage of springs, and steering gear, any of which are dangerous when speeding.

In proportion to the mileage obtained, high speeds require more gasoline and oil than a moderate rate of traveling.

Driving a car at excessive speed, especially over rough roads, subjects the bearings to enormous strains. High speed may cause crystallization of rapidly moving metal parts that are subject to strain, and these may break at any time without warning.

High speeds interfere with the accuracy of steering, as is shown by the number of reckless drivers who have gone over banks and into ditches, especially on curves.

It is a strain on the eyes and the nerves of the driver and also of the other passengers in the car.

Finally, it is a menace to the pleasure and safety of others who use the road.

The majority of modern motor cars develop their maximum efficiency with lowest expense at speeds ranging from 15 to 25 miles an hour, depending on the make of car and conditions of the road.

## Shutters on Radiators

### Kept Closed Too Long

The most important precaution to take in operating a motor car during the winter is to avoid loss of fuel and injury to the engine through the improper co-ordination between the radiator shutter and the radiator heat indicator.

Many drivers keep their shutters closed too long in winter driving because they neglect to observe the reading of the heat indicator on the radiator cap. This lack of co-ordination causes overheating of the engine, as easily possible in the winter as in the summer months, with its consequent wastage of fuel and loss of power.

On the other hand, if too little of the radiator is covered the engine will be too cool and there will be resultant poor combustion, gasoline waste, crankcase dilution and motor carbonizing.

Steaming, which often indicates trouble in summer, cannot be detected easily in winter, as the steam condenses as soon as it comes in contact with the cold air and therefore the readings of the heat indicator must be relied upon.

## Headlight Glasses Must Be Kept in Right Place

Some of the light diffusers or devices designed to redirect the rays of light, are designed to be effective only when in a certain fixed position. Vibration may so loosen the glass in the rim that the glass will be permitted to creep around, in which case the whole scheme fails. Not all headlights have means for anchoring the glass permanently, so it is a matter for the owner's attention to see that the glasses are properly fastened in place. If screws are used it might do to insert a lock washer under each one.

## Enter and leave the garage slowly.

Street car motormen, pedestrians, children, other drivers, and garage workers may not be looking.

Keep an eye on the car in front having four-wheel brakes. Cars of this type are likely to stop suddenly, thereby causing a collision.

Of the 80,000 applications for patents made annually in the United States fully one-third relate to some phase of the automobile industry.

# Horticulture News

## EARLY TRAINING OF APPLE TREE

"A satisfactory head with well scaffold branches and strong trunk that will not break down under the weight of the young apple trees," says A. Freeman Mason, specialist in growing, New Jersey State College of Agriculture.

"The first thing to do in training a two-year-old apple tree is to train the scaffold branches. If an older tree or vase-shaped apple tree is sired, three or four vigorous well distributed around the trunk, making wide-angled scaffold branches should be selected. These should be separated from the trunk by several inches, if possible, and the center branch, if one is present, should be cut off, and the tree should be trained to form a well distributed scaffold of branches, which additional scaffold branches may be selected later, after the center branch may be removed.

"If a leader-type tree is one in which a central trunk is desired, the scaffold branches are not required, wide-angled scaffold branches, distributed around the trunk at fifteen inches apart are selected. The leader or trunk is trained to a third of its height, to form the formation of additional branches. It is desirable to have scaffold branches slightly to pin branch.

In pruning young trees four should be observed: Don't cut branches with narrow angles or crotches; don't allow the tips of scaffold branches to divide into small branches; don't cut off twigs and spurs on the trunk; large branches; and don't cut back heavily."

## Prune Gooseberries and Currants to Save

The fruit of both gooseberry and currants is borne near the one-year-old wood and on the older wood. The best appear on fairly vigorous wood, few spurs are produced on wood more than two or three years old. In pruning should be to keep it fairly open and to retain a fair supply of young wood.

The most successful growers of these fruits remove each year wood and leave a good supply of two and three-year-old wood; many growers systematize the thing so as to leave as far as possible only three to four canes each year, one two and three-year-old wood, and the best kind of wood, and it also progresses with about the right amount for good results.

Currants and gooseberries pruned any time during the season. Black currants should be pruned more heavily than white currants, as a rule.

## Transplant Fruit Trees in Spring Is Best

Fruit trees can be transplanted the fall, although spring is the best time. Greater care is required in the spring because the trees are planted in the ground when set out in the spring. It is better to plant them in the fall, before planting the trees. It is beneficial to place a mulch of straw or other material around the tree upon end near the base. The tree can be filled with water during the summer months. It should be taken not to injure the tree to pack the soil firmly around the tree.

## Horticulture Facts

Spraying must be done in the early morning or late evening, otherwise destroy the fruit crops.

Look around carefully to see that all tools and equipment are placed under cover, and lost every year by tools exposed to the weather.

Because of the winter weather, last year in the West, the western pine beetle has been during any previous years in past 15 years.

Leaves make an excellent strawberry patch.

Grapes cannot be expected to produce abundantly unless the good cultivation from the start will respond to the same cultivation given corn. Some hoeing around the plant is usually necessary by a mulch and keep down the weeds. About the middle of July or August a cover crop of barley may be sown.

## IN ATHLETIC CIRCLES.

## STANISLAUS SPLITS SERIES.

Sharpshooters Lost to Reserve Hi But Rock-a-Chaw Reserves Beat Delgado.

A doubleheader was the bill at Stanislaus gym last Sunday afternoon and quite a goodly number of fans witnessed two very good and hotly contested games.

A jinx must be tucked away in the folds of the Sharpshooters' wardrobe, for after playing a good, fast game against Frank Noel's Reserve Hi team from Reserve, La., in which they outplayed the visitors in every department, their jinx rode in on the crest and they lost by one measly free shot.

The first period ended with the Sugar Boys leading by three points. When the second half came it found both sides fighting hard and an exciting game was on. The Sharpshooters worked hard and got in the lead, but the margin was not sufficient to overcome the three points. They managed to get within one marker when the final whistle blew. Clement was high man for the "Sugar Boys," with Bourgeois and Keller up close. For the locals, Fernandez, Bontemps and Rinaudo took the honors.

## Second Game.

In the second game the Rock-a-Chaw Reserves hooked up with the Delgado Trades five and defeated the city boys by a score of 24 to 18.

At no time were the locals in any danger, and they showed a marked improvement in every department of their work. The playing of Sam Haik and Rinaudo (the latter entered both contests) was of a very high class, and Noel, who was watching the game from the side lines, remarked that these two would be very successful in 1927 for any team. Haik's improvement is of a sensational character and gives promise. His shooting from the free line is not deadly.

The box score:

First Game.		Fg.	Flg.	Fc.
S. S. C.		0	0	3
Bradley, f.		0	0	1
Banville, f.		0	0	1
Thierry, f.		0	0	1
A. Franz, f.		0	0	1
Bontemps, f.		0	0	1
Levering, c.		1	1	1
Rinaudo, c.		2	0	1
Cassidy, f.		0	0	1
Thompson, g.		1	0	3
Totals		12	2	10

Reserves.		Fg.	Flg.	Fc.
Keller, f.		3	1	0
Bourgeois, f.		3	1	0
Clement, c.		5	1	1
Mader, c.		0	1	1
Waggspeck, g.		0	0	2
Total		12	3	5

Second Game.		Fg.	Flg.	Fc.
S. S. C.		1	0	0
A. Wade, f.		1	0	0

Siegen, f.	0	0	1
Hunte, f.	1	0	0
Burns, f.	0	0	0
Haik, c.	4	6	1
M. Franz, c.	1	0	3
Rinaudo, g.	1	0	2
J. Ware, g.	0	0	0
Cassidy, g.	0	2	0
Totals	8	8	7

## SCORERS IN INTER-CLASS TRACK AND FIELD MEET.

The annual Stanislaus inter-class track and field meet was held Thursday, and the competition was keen throughout. All the upper classes of the college were well represented, and several promising athletes were uncovered during the course of events. The race for first place honor was mainly between the Juniors and the Sophomores the Juniors winning 84-73.

The high point scorer of the day was Bonura, Baron and Rinaudo being tied for second place. Those who followed close behind were Jacobs and Toups. Bonura was individual star, as he was allowed to compete in one class only, while the majority of the others were allowed to compete in several classes. Following were those who showed up well: LeBlanc, Johnson, Hunter, Lacoste, Burns, Reed, Glover, Zumbrecher, Bradley, Waters, Gordon.

## Results of Different Events.

100 Yd., Class A—Jacobs, Burns, Johnson, Bonura.  
100 Yd., Class B—Baron, Rinaudo, Gordon, Diaz.  
50 Yd., Class C—Reyes, Seator, Green, Jones.  
400 Yd., Class A—Jacobs, Baron, Reed, Johnson.  
400 Yd., Class B—Baron, Rinaudo, Gordon, R. Blaize.  
400 Yd., Class C—Jones, Reyes, Green, Seator.  
800 Yd., Class A—Hunter, Reed, Burns, Ducote.  
800 Yd., Class B—Baron, Rinaudo, Blaize, Leonard.  
1600 Yd., Class A—Hunter, LeBlanc, Reed, Jacobs.  
Shot Put, Class A—Bonura, Zumbrecher, Leger, Curet.  
Shot Put, Class B—Glover, Toups, Burns, Kenner.  
Javelin, Class A—Bonura, Toups, Johnson, Curet.  
56 Lb. Wgt., Class A—Zumbrecher, Boudin, Leger, McCauley.  
Hammer, Class A—Bonura, Guidrey, Dubinson, Glover.  
Discus, Class A—Bonura, Toups, Glover, Curet.

Broad Jump, Class A—Jacobs, Bonura, Rinaudo, Ducote.  
Broad Jump, Class B—Rinaudo, Toups, Baron, Lacoste.  
Broad Jump, Class C—Bradley, Eisler, Jones, Minou.  
High Jump, Class A—Lacoste, Bonura, Rinaudo, Reyes.  
High Jump, Class B—Lacoste, Rinaudo, LeBlanc, Baron.  
The present indications are for a wonderful track team for St. Stanislaus for this season. Even though the last year's team won the Southern championship last year, we expect an even better team this year. We mean to win the A. A. U. again this year, which is to be held at Lafayette, under the auspices of Louisiana Southwestern.

It is known that Bonura will journey to Philadelphia this year to enter the national track and field meet, and with present indications our big "Zel" will have company on the trip, for several boys are showing some real stuff, and if they keep it up they are going to be hard to beat. There are going to be some real good track meets this year, and I can assure you that they will be very interesting.

## BLIZZARD BLOWS AWAY ANOTHER TEAM.

Bay St. Louis Hi Defeats Logtown. Game Full of Pep and Vim.

You think about a real blow-up! Well! You should have seen the Bay High ball team Thursday, in Bay St. Louis, take Logtown by surprise and blow up a score of 32 to 18. It was the peepiest game the Blizzards have played. The Logtown girls played good ball, but were outclassed so far that it made the Blizzards calm down until the next game with Logtown, which will decide county championship and determine the team to which the loving cup, donated by Logtown, will be presented.

The girls are joyous over their victory and are delighted over the tour on which they begin next Tuesday. The team is one of the best anywhere when it comes to life, pep, sportsmanship, and Bay St. Louis is proud of them.

The team contributes its victories to the continuous training, strenuous practice and thorough coaching of Miss Mamie Harper. Whoopie! Lookout for the Blizzards! Here it goes!!! The Blizzards are backing its brother team in all of its ups and downs. Call on us, Yellow Jackets.

## LOGTOWN 22, BAY HI 8.

Thursday afternoon on the Bay High School court the Logtown boys' basketball team won its second straight game of the season from Bay Hi. This is the first time that Logtown has been able to take a series of games from the Bay Hi boys since the two schools have been playing basketball, which covers a ten-year period. The game was

hard fought from the start, the Bay team was determined to wipe out their first defeat and were leading at the start. The close guarding and faster passwork of Logtown proved too much for them and once in the lead the Logtown boys kept a safe distance in front. The score at the end of the first half was Logtown 11, Bay Hi 5. The second half was all summa duplicate of the first, the Logtown team scored 11 points, while the best the Bay could do was 3. During the last few minutes of play Logtown had an entire new team on the floor, which kept up the good work of the players they had followed. John Marquez, who scored 15 of his team's 22 points, and the close guarding of the entire team were the features of the game, while Cowan and C. Tremolet were much the best for the Bay boys.

The line-up:		Fg.	Flg.	Fc.
Logtown		1	0	0
Davis, H. f.		0	0	1
Mitchell, f.		0	0	1
Marquez, f.		7	1	1

## WORK AND PLAY

## AT S. J. A.

## Retreat.

Last week the Children of Mary were on a retreat. It started Thursday night and closed Sunday morning. The time was spent in prayer and instructive sermons by Rev. Father Madden, S. J. It was enjoyed and appreciated by all who attended. Each sermon was a lesson in itself. Father Madden told us that his one wish was to make us realize that we have a soul to save. His words would have made a heart of stone, and I am sure he accomplished his end, for I feel that there was not one person there who did not stop to meditate and resolve to do better. The Children of Mary want to thank Father for what he has done for them and hope he will honor us by another retreat next year.

## Fast Follows Feast.

If you can picture a group of girls crowded together each trying to be heard above the other, telling what she saw and what she did, you have a vague idea of how S. J. A. looked Wednesday morning before Carnival was the topic of the conversation that could be heard far and near.

"Oh! I had the cutest time at the dance, didn't you?"  
"Should say so!"  
"Did you go to New Orleans for Carnival? Gee, but it was crowded. I never saw so many maskers in my life."  
"Hey, Vivian, you certainly did miss a good time."  
Well, girls, your good times must end for a while, and remember it is Lent. Let pleasure drop and try to make some good resolutions, for you must remember that all joys with no thought of Him, to whom we owe much, will never do.

We Wonder Why—  
Bessie is called Dumb Dora?  
Erin is on the war path?  
Evelyn loves cows?  
Vivian is her bright self again?  
Bee is called the English expert?  
Margaret B. is so melancholy?  
Mary is so contented?  
Aimee agrees with Erin?

Improvements.  
The Juniors' new invention that should have greater merit than the Radio.  
Bertha is a Charleston fiend.  
Kitty sings "Clap hands, here comes Charley."  
The Seniors are a wonderful example for the Juniors. (So they think.)

## Game With New Orleans.

We invite you to see us beat (?) New Orleans "Speeders" on the 28th, at the College Gym, 10:45 a. m. The girls are all pepped up and promise their team a good fight. All our girls need is a little cheering when the enemy is near and if you all come and help keep their spirits high the game is ours. You know there is nothing in the world more likely to lead a team to victory than to have a goal to work for, so let that be your motto, and let your hearts in your mouths shouting to let them know that victory must be ours. Come, friends, and root for old S. J. A. Two games will tell the tale.

## Roll of Honor.

Seniors: Alice Blaize, Mary So-fide, Kitty O'Leary, Caroline Logan, Bessie Batson.  
Juniors: Victoria Gabriel, Mary Bourgeois, Goldine Brown, Alberta Byer, Eryn Saucier.

## NOTICE OF TRUSTEE'S SALE.

Under and by virtue of the provisions of that certain deed of trust, executed by J. J. Schell, on January 29th, 1922, to W. J. Gex, Trustee, to secure an indebtedness mentioned therein in favor of S. H. Schell, which deed of trust is recorded in Book 16, page 388, of the Records of Mortgages and Deeds of Trust on Land in Hancock County; said, whereas, the said secured indebtedness was assigned by S. H. Schell to Brownie Coleman on June 28th, 1922, which assignment is recorded in Book 16, pages 389-90, of the Records of Mortgages and Deeds of Trust on Land in Hancock County; and, whereas, as the said Brownie Coleman, by virtue of the said assignment, is now the owner of the said indebtedness, and, whereas, the said indebtedness is now due and unpaid, and having been requested by the said Brownie Coleman, as the holder of the said indebtedness, to foreclose said Deed of Trust, I, J. D. Arrington, Substituted Trustee, will, on Monday, February 15th, 1926, within legal hours, in front of the Court House of Hancock County, sell to the highest bidder for cash the lands described by the said Deed of Trust, to-wit:  
The southeast quarter of Section twenty-six (26), Township seven (7), south, Range fifteen (15) west, in Hancock County, Mississippi, subject to that deed of trust executed on the same land by M. L. Kelley to C. L. Walker in favor of Carolina Land Company, assumed by the said Alfred Schell, and recorded in Book 16, page 212, of the Records of Mortgages and Deeds of Trust on Land in Hancock County, to satisfy the indebtedness above mentioned.  
Advertised, posted and dated this January 21st, 1926.  
J. D. ARRINGTON,  
Substituted Trustee.

THE broad, thick semi-flat tread of Blue Pennant Cords gives sure traction in the worst going, with less wear and consequently greater service.

The combined result of this exceptional semi-flat tread and extra strong construction is a length of easy-riding, trouble-free service which proves that equipping with Blue Pennant Cords is a distinct economy.

## City Echoes.

—Stoverwood for sale. Phone 263-M.

—WANTED—One thousand peacocks. Address F. A. Tomlinson, Gulfport, Miss.

—Mr. W. L. Bourgeois spent Wednesday afternoon at Gulfport in the interest of real estate business.

—Mr. and Mrs. Winfield Partridge and family spent the Carnival days in Mobile, visiting friends, and in which city they formerly resided.

—Tuesday, Washington's birthday, a legal holiday. Both the Hancock County Bank and the Merchants Bank will be closed for the day. The public will take notice accordingly.

—Mrs. A. S. Johnston, resigning her position with the Chamber of Commerce, Miss Agnes Laguel has been appointed her successor and will assume the position March 1st.

—Mr. and Mrs. E. J. Leonard had as their guests on a motor trip along the Gulf Coast Wednesday Mrs. S. A. Power and her house guests, Mrs. Albert J. Davis, registering for dinner at the Bona Vista.

—Mrs. A. F. Fournier and daughter, Miss Margery, a student of Gulf Park College, and son, Mr. Forster Fournier, spent the Carnival week-end in New Orleans, visiting relatives and friends and participating in the social activities of the season.

—Frank Mann, the jeweler and watch maker, has moved from his former location in Main street, to Front street, south of The Echo Bldg., and is ready for business. He has a larger and attractive place and invites his friends and patrons around.

—Mrs. W. E. Dakin left during the week for St. Louis, Mo., on receipt of a message announcing the illness of her daughter, residing in that city. Rev. Dakin, rector of Christ Episcopal church, remained at home attending to his church charge. The hope is expressed the patient will soon be restored to former good health.

—Mr. and Mrs. Oscar Denton, who have been spending a while here, visiting Mrs. J. H. Bouslog, the latter's mother, and family, left Tuesday morning by way of New Orleans for their home at Springfield, Mo. They had planned to visit Florida points while South, but unable to secure steamer reservations from New Orleans, had to forego the pleasure.

—Mrs. W. O. Sylvester was called to a M. O. College this week by a message announcing the illness of her son, Ellis, who underwent an operation for appendicitis, and the Echo is glad to learn, is doing nicely as could be expected. Young Sylvester is a son of Judge and Mr. Sylvester and is extremely popular with his classmates and all who know him.

—Mr. and Mrs. C. C. McDonald spent Wednesday in New Orleans, where they attended a theatrical performance of "Mr. Wu," at the Tulane Theatre, featuring Miss Sidney Shields, as leading lady, daughter of our esteemed townspeople, Mr. and Mrs. Bernard Shields, and enjoyed the excellent performance. The press of New Orleans gave the play more complimentary notices.

—Mayor Blaize and Street Commissioner Taconi had a force of men Thursday afternoon working on the street in front of the electric and ice plant after the heavy showers of the night previously. This was the first rain since the paving in that location was finished and the part remaining unpaved afforded a deep and wide basin retaining surplus water. In time, it is expected to have many like "kinks" over the city removed.

—Mr. and Mrs. E. J. Lacoste and young Miss Yvonne Lacoste left New Orleans this morning, sailing for Havana, Cuba, where they will remain for two or three weeks. While in Cuba they will visit several points of interest on the island. Mr. Lacoste will combine business with pleasure. Quite a number of friends in Bay St. Louis and at New Orleans witnessed the departure of the little party to wish them "bon voyage."

—Mr. Gus E. Temple received a message this week from Napoleonville, La., announcing the death of Hon. John Marks, a leader for many years in political affairs of that territory and one of the best known men in Louisiana, a native of Assumption parish, born January 5, 1868. Mr. Marks was an attorney by profession. At one time he was prominently mentioned for the governorship of his State. Mr. Temple has the sympathy of the many friends through Louisiana and this section of Mississippi.

—County Assessor E. Van Whitfield returned home a few days since from Jackson, where he attended a conference of assessors from other parts of the State, who appeared before the Legislature seeking an extension of the regular time in which to do the regular and extra work, the latter imposed by a special bill passed by both branches of the Legislature. Assessor Whitfield will soon start out on his annual tour of the county with a supply of new blanks for 1926. He will do the county work first.

—A CARD OF THANKS FROM M. T. BANGARD.

I wish through this medium to thank every one who voted for me Saturday in my race for tax assessor and to assure them of my appreciation. I want to thank the public in general for the fair and uniform courtesy I was accorded all through the campaign, and certainly I hold no ill feeling toward no one.

Respectfully,  
MURRAY T. BANGARD.

Bay St. Louis, Miss., Feb. 17, 1926.

A CARD FROM F. H. EGLOFF.

Realizing the meaning of the splendid vote given me Saturday, which gave me the nomination for city assessor and tax collector, I wish to heartily thank the voters and the public in general for their support and appreciation of this expression, will continue to administer to the business of my office with every effort possible in the way of application and results.

Very truly yours,  
FREDERICK H. EGLOFF.

Bay St. Louis, Miss., Feb. 17, 1926.

## HERE IT IS

NEW 1926 MODEL FORD SEDAN, BALLOON TIRES.

## MAKE IT YOURS

Below are the names of the Candidates in The Sea Coast Echo Contest, the names being listed alphabetically. The standing shows the number of votes cast for each up to last Wednesday night.

The next count will be made after all reports from Candidates are in next Saturday night, February 20th. This count will be posted on circulars and circulated throughout Kiln, Logtown, Waveland, Nicholson and Bay St. Louis.

### WHO WILL LEAD SATURDAY NIGHT?

Miss Samantha Blackwell, Nicholson, Miss.	9,150
Miss Margaret Green, Bay St. Louis, Miss.	985,000
Miss Agnes Laguel, Bay St. Louis, Miss.	938,600
Miss Ena LeBlanc, Bay St. Louis, Miss.	1,136,200
Mrs. A. J. Loft, Kiln, Miss.	962,000
Mrs. John McCarty, Nicholson, Miss.	18,000
Miss Elizabeth McQueen, Nicholson, Miss.	101,400
Miss Lottie Bell Summers, Logtown, Miss.	1,126,000
Mrs. O. M. Villere, Waveland, Miss.	814,900

### HELP YOUR FRIENDS TO WIN, NOW!

### IN SOCIAL CIRCLES.

#### Bal Masque at B. W. Club.

The Bay-Waveland Club closed its winter season with a most delightful bal masque at its clubhouse on the south beach end Saturday night. Carnival colors served as the key-note for the hall decorations, and were brought out with both tasty and fetching effect. It was evident some master mind and willing hands had been at work.

It has ever been the policy of the B. W. C. to provide the services of the best dance orchestra obtainable, and Saturday night did not prove the exception. The musicians were imported for the occasion, and delighted the dancers from 9 o'clock to midnight.

From 9 to 10 o'clock guests arrived and each group of arrivals attracted the interest and frequently the admiration of those already within. Different characters were portrayed. The maskers represented different type and class, each concealing their identity to such an extent that it was impossible to make interesting speculating as to the identity of this one or that one.

Interesting among the maskers were two Gypsy girls, whose identity was concealed the longest. They attracted much interest. Finally it was discovered one was a popular young matron and the other an equally well known mademoiselle.

Another interesting group was a number of young matrons dressed alike. Their costumes were patterned after a chorus scene in the opera "Student Prince." Their similar dresses baffled their identity even after once discovered.

A number of fancy and attractive costumes were noted. In all the ball was a pretty affair and one of every moment a pleasurable one. The club plans to entertain again shortly after Easter.

#### Mrs. A. F. Fournier's Luncheon-Bridge.

Claiming considerable interest was the beautiful and delightful luncheon-bridge given Saturday afternoon by Mrs. Alexander F. Fournier in the dining room and parlors of the Weston Hotel.

A feature of the effective decoration was the shading of the Carnival colors in carries of purple, yellow and green, represented by violets, yellow jonquils and maiden hair ferns. Individual baskets at each table were filled with bon-bons of three hues. The lace cards, numbered, were combined with the bridge tally, to be used later. These were ornamented with ribbon of the tri-color.

There were eight tables of bridge players, and at the end of the fifth game the score totals were taken and prizes awarded, first to Mrs. Chas. G. Moreau and Mrs. Donald Marshall, while Mrs. E. J. Dubuc captured the consolation.

Among those present were Mrs. S. J. Davis, Mrs. Richard Bryson, Mrs. Oscar Denton, Mrs. Harry Upm, Mrs. Valentine Dell, Mrs. S. A. Power, Mrs. E. J. Lacoste, Mrs. Geo. R. Rea, Mrs. E. J. Dubuc, Mrs. E. W. Drackett, Mrs. Donald Marshall, Mrs. C. C. McDonald, Mrs. R. de Montuzin, Mrs. Kenneth Pepperdene, Mrs. A. W. Starlipper, Mrs. John Weston, Mrs. Belle H. Penrose, Mrs. Alvah P. Smith, Mrs. J. A. Evans, Mrs. Chas. G. Moreau, Mrs. Horace W. Avery, Mrs. John N. Wisner, Mrs. Ernest J. Leonard, Mrs. H. U. Cauty, Mrs. Owen Crawford, Mrs. Winfield Partridge, Mrs. Victor Camors, Misses Dorothy Weston, Evelyn Lacoste, Mary Perkins.

In addition to the beautiful prizes awarded to the winners of the afternoon, dainty handkerchiefs were presented to the guests of honor of the evening, Mrs. Don. Upham, Mrs. Davis and Mrs. Bryson.

Mrs. Power's Party For Mrs. Davis. Mrs. S. A. Power was hostess Thursday afternoon at her home on the beach front at bridge in compliment to her house guest, Mrs. S. J. Davis, of St. Louis, who is spending part of the winter on the Gulf Coast, and Mrs. Richard Bryson, of Tennessee, house guest of Mrs. A. F. Fournier.

The party was most unique. There were forty prizes awarded. At the end of every game the two winners of every table of four players were rewarded for their success. A tray

of fancy edibles, either in original package or in can, was passed, and a selection was made by the winners. This alone created considerable interest and amusing comment. In addition, a consolation prize was "cut for," Miss E. Lacoste receiving the favor.

Among those present, including Mrs. Davis and Mrs. Bryson, also Mrs. Abrahams, who assisted Mrs. Power in entertaining, were Mrs. W. Starlipper, Mrs. Kenneth Pepperdene, Mrs. Victor Camors, Mrs. E. J. Leonard, Mrs. E. W. Drackett, Mrs. H. U. Cauty, Mrs. Geo. R. Rea, Mrs. A. A. Evans, Mrs. Chas. G. Moreau, Mrs. E. J. Lacoste, Mrs. W. J. Harrison, Mrs. C. C. McDonald, Mrs. R. de Montuzin, Mrs. Owen Crawford, Miss E. Lacoste.

Mrs. Power's party to honor guests within the social circle was most charmingly evolved, and cleverly carried out in every little conceit and detail, a credit to this well known and successful hostess.

### WEEKLY ECHOES FROM ST. STANISLAUS

#### Stanislaus Splits Twin Bill.

Sunday afternoon the Stanislaus 135 lost a game to the Reserve Hi School. Their opponents were much heavier, but while the 135 put up a game fight, they could not overcome the lead that was accumulated during the first part of the game. Thompson and Fernandez were the outstanding players for Stanislaus, while Wagners stood out in his passwork for the visitors.

In the second contest the S. S. C. Reserves, lead by Capt. Haik, defeated the Delgado Trade School by a large margin. The game was interesting from start to finish. Haik dazzled his opponents with his spectacular shooting from all angles. Hunter played well and was at all times in the midst of the fray. For the losers Wagner and Quinn were the outstanding stars.

#### Baseball.

Monday morning Mr. Commegere called out the candidates for baseball. Quite a number of boys are out, and present prospects are for a fine team this year. The league started Wednesday evening, the game being between Montz's All Stars and Fernandez's Go Get 'Em. Montz's Stars won by a score of 3-2. Other games will be played in the near future. All pitchers are working fine and their crooks are good as can be expected.

#### Brother Edmond's Departure.

Rev. Bro. Edmond, quite a favorite at the College and a teacher who has brought Class '26 up for the past three years, left us last Sunday evening. He was accompanied by Rev. Bro. William. The two men who journeyed through the foreign countries studying. We regret to see Bro. Edmond leave. For the wedding trip they were showered with rice by the boys from Stanislaus.

#### Brother Peter's Return.

The students and faculty of Stanislaus have received many pleasant surprises during the past years, but none can be compared with the wonderful surprise of Friday morning. Our beloved Brother Peter returned after an extensive tour of the Old World. The students are delighted to have their favorite among them again, and it was easy to see from the hearty welcome that they extended him.

After a short talk in the study hall, telling us how glad he is to be back, he dismissed classes for the day.

#### A Visitor For Bay St. Louis.

It is said that Blenk Young, after receiving his sheepskin, will return to the Bay to spend the summer months. We wonder why?

#### Carnival Ball.

For the first time in the history of Stanislaus, the Senior Class conducted a Carnival ball. It was a thorough success, owing to the fine spirit shown by the members of Class '26, to the hard work of Bro. Regis, and to the splendid aid of the following kind ladies: Mrs. R. N. Blaize, Miss Mary Wingerter, Mrs. W. D. Bonjean, Mrs. H. C. Glover, Mrs. W.

Sigerson, Mrs. R. J. O'Leary, Mrs. E. C. Favard, Mrs. E. J. Giesing, Mrs. P. Donbin, Mrs. E. J. Giesing, Mrs. J. A. Green, Mrs. E. J. Lacoste, Mrs. A. A. Kergosien, Mrs. W. Gex, Mrs. G. Boh, Mrs. R. S. Plunkett, Mrs. M. Ballard, Mrs. E. Gex.

Class '26 extends its heartfelt thanks for the kindness of these ladies. Owing to the wonderful success of the ball, it is hoped that it will be made an annual affair. Every one hopes that this can be done.

### Class Play!

Monday night the community will be treated by a fine play, conducted by the members of the ninth grade. It is said that this play will far surpass any seen this year, produced by college students.

Be sure not to miss it, for you may never get another chance to see another like it.

Remember!! Monday night, the 22nd, 7:45 p. m., at College Gym!!

### A CARD FROM S. J. LADNER.

I wish through this medium to express my thanks and appreciation to the people of Bay St. Louis and especially the voters for their support Saturday, which resulted in my securing the nomination for city auditor and secretary. It was kind and thoughtful and I certainly appreciate the consideration. In return it will be a pleasure for me to continue in the strict performance of my duty as I see fit and proper and to the best advantage of the trust reposed in me by the voters and taxpayers.

Respectfully,  
SYLVAN J. LADNER.

Bay St. Louis, Miss., Feb. 17, 1926.

### A CARD FROM JAMES MARTI.

In recognition of the success at the polls Saturday which gave me the nomination for city auditor and secretary, I wish to publicly thank one and all who voted for me and also to others unable to vote but who gave me all the support possible. When in office, I hope to make myself worthy of the confidence of one and all.

Very truly yours,  
JAMES MARTI.

Bay St. Louis, Miss., Feb. 17, 1926.

### CARD OF THANKS.

I wish to thank one and all who supported me during the primary election, and will always feel grateful to them for their loyal support. I congratulate Mayor Blaize on the returns of the election and hope that his administration will be a success.

H. C. GLOVER.

### MAYOR BLAIZE THANKS PUBLIC

Through the columns of The Sea Coast Echo I wish to thank the public and the voters particularly for the vote and support given me in the election Saturday. It was a splendid vote and assures me of the extent of the public esteem and confidence which has come to me.

I want to make myself and effort for a Better Bay St. Louis worthy of this support and I will ask the continued co-operation and support of our good people. My ambition is to give the city the new public school building as quickly as possible, the new skating rink and playground and all other projects that were part of my platform. And while I favor every improvement possible, it will be my endeavor to keep a heavier taxation down.

Thanking the ladies and gentlemen again who made my success possible, I remain,

Very truly yours,  
G. Y. BLAIZE.

Bay St. Louis, Miss., Feb. 17, 1926.

## GEORGE WASHINGTON HAD MONEY IN THE BANK!

22nd WHY DONT YOU START A BANK ACCOUNT? YOU WILL BE BETTER SATISFIED with YOURSELF and the WORLD

A Bank account is a Declaration of Independence

We Americans of today could take a lesson in thrift from the famous Father of Our Country.

George Washington lived well and was generous, but he never wasted his money on silly extravaganzas.

There are many ways to waste money these days, but if we follow the same sane spending as Washington did we will prosper and be happy.

Put your spare money in our Bank.

We will welcome you.

</
